APPLICATIONS
See application list inside

Toyota/Scion multi-kit 2000-up
95-8202

KIT FEATURES
• Double DIN radio provision
• Stacked ISO DIN radio provision

KIT COMPONENTS
• A) Double DIN trim plate

WIRING & ANTENNA CONNECTIONS (sold separately)
Wiring Harness:
• 70-1761 Toyota harness 1987-up
• 70-8113 Toyota harness 1987-up
• TYT0-01 Toyota amp harness 2003-up
Antenna Adapter:
• Not required

TOOLS REQUIRED
• Cutting tool • Phillips screwdriver • Socket set
• Grinder

CAUTION: Metra recommends disconnecting the negative battery terminal before beginning any installation. All accessories, switches, and especially air bag indicator lights must be plugged in before reconnecting the battery or cycling the ignition.

NOTE: Refer to the instructions included with the aftermarket radio.

2
**Toyota Rav4 2001-2005**

1. Unclip and remove side panel from both sides of radio and climate controls. (Figure A)
2. Remove (4) Phillips screws securing the radio/climate control trim panel. (Figure B)
3. Remove (4) 10 mm bolts securing the radio. (Figure C)
4. Unplug and remove radio.
5. Remove factory brackets from radio. Retain brackets for use during kit assembly.

*Continue to kit assembly*

**Toyota MR2 Spyder 2000-2003**

1. Unsnap the lower trim piece from each side of the dash console and remove (2) Phillips screws exposed in each cavity. Remove the upper trim piece from each side of the console. (Figure A)
2. Remove the climate control knobs and (2) Phillips screws exposed. Remove the climate control trim bezel. (Figure A)
3. Remove the ashtray and (1) 10mm bolt exposed. Unclip the ashtray trim bezel and remove. (Figure A)
4. Unclip the radio trim bezel, remove (4) Phillips screws securing the unit and disconnect the wiring.
5. Remove factory brackets from radio. Retain brackets for use during kit assembly.

*Continue to kit assembly*
**Toyota Celica 2000-2005**

1. Unclip and remove the gear shifter trim bezel and remove (2) Phillips screws exposed below the climate controls. (Figure A)

2. Pull off climate control knobs and remove (2) Phillips screws exposed. (Figure A)

3. Unclip the climate control/factory radio trim bezel and remove. (Figure A)

4. Remove (4) 10mm screws securing the factory radio and disconnect the wiring.

5. Remove factory brackets from radio. Retain brackets for use during kit assembly.

   *Continue to kit assembly*

---

**Toyota Echo 2000-2005**

1. Remove the climate control knobs and (2) Phillips screws exposed. Unclip and remove the climate control trim bezel. Depress the side clips securing the climate control panel and move the panel to access (2) Phillips screws from the top of the factory radio brackets. (Figure A)

2. Remove the ashtray. Unclip and remove the radio trim bezel. Remove (2) Phillips screws from the bottom of the radio brackets and disconnect the wiring.

3. Remove factory brackets from radio. Retain brackets for use during kit assembly.

   *Continue to kit assembly*
1. Pull and remove dash panel from radio and climate controls. Tip: There are 8 clips. (Figure A)
2. Remove (6) 10mm bolts from radio and climate controls assembly. (Figure B)
3. Remove assembly and disconnect the wiring.
4. Remove (8) Phillips bolts and (4) Phillips screws to separate brackets from assembly. Retain brackets for use during kit assembly. (Figure C)

**Continue to kit assembly**
**Toyota Matrix 2009-2010 (with factory navigation)**

1. Unclip and remove the radio trim panel including the A/C vent. (Figure A)
2. Remove (4) 10mm bolts securing the factory radio. Unplug and remove the radio. (Figure B)

   *Continue to kit assembly*

**Toyota 4 Runner 2003-2009 (excluding Limited)**

1. Unsnap and remove trim from around shifter.
2. Unsnap and remove trim covers from around center console pocket edge at front and rear of console.
3. Unsnap and remove center console cover. (Figure A)
4. Unsnap trim ring from around ignition key cylinder.
5. Remove (1) 10mm bolt from bottom right of panel below steering column. Unsnap panel and pull away to gain access behind panel. (Figure B)
6. Remove (1) 10mm bolt on bottom left of center panel behind panel below steering column. (Figure B)

   *Continued on next page*
7. Remove (1) 10mm bolt beneath climate control behind pocket door. Unsnap and remove climate control. (Figure C)

8. Remove (2) 10mm bolts beneath radio behind climate controls.

9. Unsnap and remove entire center panel around radio. (Figure D)

10. Remove (2) 10mm bolts securing radio.

11. Unplug and remove radio.

12. Remove factory brackets from radio. Retain brackets for use during kit assembly.

   Continue to kit assembly

---

1. Remove the (3) climate control knobs by pulling straight outward. (Figure A)

2. Remove (3) Phillips screws from behind knobs. (Figure A)

3. Position vents facing upward and remove (1) Phillips screw from each A/C vent. (Figure B)

   Continued on next page

---

Toyota 4 Runner 2003-2009 (excluding Limited)

---

Toyota Tundra 2003-2006
**Toyota Tundra 2003-2006**

4. Unclip and remove entire trim panel. (Figure C)

5. Remove (4) 10mm bolts to remove radio. (Figure D)

6. Unplug and remove radio.

7. Remove factory brackets from radio. Retain brackets for use during kit assembly.

   *Continue to kit assembly*

**Toyota Sequoia 2003-2007**

1. Position vents facing upward and remove (1) Phillips screw from each A/C vent. (Figure A)

2. Unclip and remove entire radio trim panel including climate controls. (Figure B)

3. Remove (4) 10mm bolts to remove radio. (Figure C)

4. Unplug and remove radio.

5. Remove factory brackets from radio. Retain brackets for use during kit assembly.

   *Continue to kit assembly*
1. Remove two Phillips screws from bottom part of side trim panels. (Figure A)

2. Using a panel removal tool, carefully remove the side trim panels. (Figure B)

3. Remove (2) Phillips screws from radio trim panel. (Figure C)

4. Using panel removal tool, carefully remove radio trim panel. (Figure D)

5. Remove (4) 10mm bolts securing the radio.

6. Unplug and remove radio.

7. Remove factory brackets from radio. Retain brackets for use during kit assembly.

*Continue to kit assembly*
1. Unclip the bottom trim panel located underneath the A/C controls. (Figure A)
2. Unclip the two side trim panels that surround the A/C controls and radio. (Figure A)
3. Unclip the Instrument trim panel surrounding the speedometer and gauges. (Figure B)
4. Unclip the radio/AC vents trim panel. (Figure B)
5. Remove (4) Phillips screws securing radio. (Figure C)
6. Unplug and remove radio.
7. Remove (4) Phillips screws securing factory brackets on each side of the radio and remove brackets. Retain brackets for use during kit assembly. (Figure D)

*Continue to kit assembly*
Scion FR-S 2013

1. Unclip and remove the panel from around the radio. (Figure A)
2. Remove four 10 mm bolts and remove factory radio. (Figure B)

   Continue to kit assembly

Scion IQ 2012-2013

1. Unclip and remove the climate control panel. (Figure A)
2. Unclip and remove the panel from around the radio. (Figure B)
3. Remove four 10 mm bolts and remove factory radio. (Figure C)

   Continue to kit assembly
1. Pull outward on the (3) climate control knobs and remove. (Figure A)
2. Remove (2) Phillips screws from behind the outer two climate knobs. (Figure B)
3. Unsnap and remove the trim pieces on each side of the climate control/ashtray/pocket assembly. (Figure C)
4. Remove (2) Phillips screws from the bottom of the climate control/radio trim panel and unsnap and remove the entire panel. (Figure D)
5. Remove (4) Phillips screws to remove the factory radio.
6. Remove factory brackets from radio. Retain brackets for use during kit assembly. 
   Continue to kit assembly

Scion XB 2004-2007

1. Pull outward on the (3) climate control knobs and remove. (Figure A)
2. Remove (2) Phillips screws from behind the outer (2) knobs. (Figure B)
3. Unsnap and remove the entire panel surrounding the climate controls and the radio. (Figure C)
4. Remove (4) Phillips screws to remove the factory radio.
5. Remove factory brackets from radio. Retain brackets for use during kit assembly. 
   Continue to kit assembly
1. Unclip and remove the trim panel around the radio including the A/C vents. (Figure A)

2. Unclip and remove the trim panel at the bottom edge of the dash cavity. (Figure B)

3. Remove (4) 10mm bolts securing the radio. (Figure C)

Continue to kit assembly

---

1. Unsnap trim from around shifter (not necessary to be removed). (Figure A)

2. Unclip and remove panel from around radio (including climate controls and radio door). (Figure B)

3. Remove (2) 10mm nuts from the top mounting locations and (2) 10mm bolts from the bottom mounting locations to remove the radio. (Figure C)

4. Remove factory brackets from radio. Retain brackets for use during kit assembly.

Continue to kit assembly
### Scion TC 2011-up

1. Unclip and remove the radio trim panel. (Figure A)

2. Remove (4) 10mm bolts securing the radio. (Figure B)

3. Remove factory brackets from radio. Retain brackets for use during kit assembly.
   
   *Continue to kit assembly*

### Scion XD 2008-up

1. Unclip radio trim panel. Unplug and remove panel. (Figure A)

2. Remove (4) Phillips screws securing the radio. Unplug and remove radio. (Figure B)

3. Remove factory brackets from radio. Retain brackets for use during kit assembly. (Figure C)
   
   *Continue to kit assembly*
**Subaru BRZ 2013**

1. Unclip and remove the panel from around the radio. (Figure A)

2. Remove four 10 mm bolts and remove factory radio. (Figure B)
   
   *Continue to kit assembly*

---

**Subaru Forester** (with SD based navigation)

**2009-2013**

1. Unclip and remove the trim panel surrounding the factory radio including the A/C vents. (Figure A)

2. Remove (4) Phillips screws securing the radio. Unplug and remove the radio. (Figure B)

   *Continue to kit assembly*
NOTE: For all Scion TC and XA you will need to cut off the front upper section of the Double DIN trim plates, as shown by dotted lines labeled “A” in (Figure A).

For the 2001-2005 Toyota Rav4, 2001-2007 Toyota Highlander, 2003-2006 Toyota Tundra and 2003-2007 Toyota Sequoia you will need to cut off the rear section of the double DIN trim plates, as shown by dotted lines labeled “B” in (Figure A).

For all other vehicles skip to Step 1.

1. Locate the factory wiring harness in the dash. Metra recommends using the proper mating adapter from Metra or AXXESS. Re-connect the negative battery terminal and test the unit for proper operation.

2. Attach the factory mounting brackets and the 95-8202 double DIN trim plates to the double DIN radio with the screws supplied with the unit. (Figure B)

   NOTE: Remove locating pins from factory brackets with grinder.

4. Reassemble dash in reverse order of disassembly.
1. Locate the factory wiring harness in the dash. Metra recommends using the proper mating adapter from Metra or AXXESS. Re-connect the negative battery terminal and test the unit for proper operation.

2. Attach the factory mounting brackets and the 95-8202 double DIN trim plates to the stacked ISO DIN radios with the screws supplied with the units. (Figure A)

   NOTE: Remove locating pins from factory brackets with grinder.

4. Reassemble dash in reverse order of disassembly.
